Alice, Elizabeth and Tim,

Thank you all for taking the time to speak with me today at the LPRRP meeting.

Please look at the boat ramp low tide picture in the I BOAT NJ Part II application. This picture was included with the letter to the Lt Governor.

The plan will be to have the Dredge Doctor remove the silt and rocks and place it into the geotubes on the parking lot. After de-watering, the 10 trucks will deliver the 200CYDS of geotubes to the disposal facility that is planned to accept the 40,000 CYDS to be removed from River mile #3.

The attached documents should clarify what is planned.

I fully realize that approval and funding are the keys to make this scheme work.

Harvey
